16	<u>Universal Service Fund Allocation- Prior Year</u>

Executive Summary

The FY01 DISN Service Rates provided in the attached Rate Letter are similar to those provided in FY00 in both rate calculation/allocation method and billable service unit pricing. The following summarizes the changes made between the FY00 and FY01 rates:

- IP Router Services: Dual-Home Special Pricing has been eliminated.
- Defense Message System (DMS) Life-Cycle-Maintenance (LCM): 10% increase in the allocations.
- Red Switch Services: 4.2% reduction in overall allocations; change in ports per MILDEP has changed proportionate shares.
- DSN Services: Some increases in minute-of-use prices (SWA-SWA, SWA-CON), some decreases in minute-of-use prices (JA/OK to outside destinations), but overall program reduction. MLPP charges reduced 45.6%.
- HITS Services: In order to execute original investment agreement with fewer phone lines (customer bundling lines behind PBX's), price for PBX trunk will be 2.5 times higher.
- Transmission-SWA: New DWCF-CISA Program
- VTC Services: PAC Allocations per MOA, EUR Allocations per EUCOM J-6 Message, CONUS no change.
- USF Surcharge: 7.91% applied to DISN Service Revenues except for DMS, Red Switch, CSCI, JWICS and Tier 1.

The dynamic technological environment within which we operate is driving fundamental paradigm shifts in the acquiring and providing of DoD telecommunications services. In accordance, DISA is evolving our business processes, product offerings, and customer relationships to ensure that we continue to be responsive to our customers - fully meeting their mission needs while assuring that DoD enterprise requirements (security, interoperability, affordability) are satisfied. This evolution, initiated with the establishment of our new Network Services organization, will manifest itself in changes customers will soon see.

A prime example of those changes is DISA's forthcoming Community of Interest (COI) Network Services product line.

This product line will provide COI services to customer base-level service delivery points (SDP's) via the DISN. The service will be engineered and managed as a part of the DISN, and will offer a cost-effective, secure, interoperable enterprise alternative to existing Service and Agency legacy networks. Specific agreements associated with COI network services partnering are:

- the COI Network shall meet DoD network certification and accreditation requirements, comply with the Global Information Grid (GIG) Information Assurance (IA) and Network Operations Guidance and Policy Memoranda (G&PM).
- the COI Network will maintain interoperability with the DoD/Service Components in accordance with DoDD 4630.5 and other applicable DoD policies.
- the COI Network will obtain internet access exclusively via NIPRNET.
- both DISA and the COI Network Customer will share near-real time network visibility and performance information, as necessary, to ensure end-to-end performance.

DISN pricing for the COI Network Services have not been solidified to date, but efforts are underway to establish the pricing structures and the business processes that will be implemented for the new product line. Once this has been accomplished (projected by the end of December 00), the applicable information will be published as an addendum to this rate letter.

Other changes DISA will pursue over the next fiscal year include expansion of this "rate book" into a comprehensive catalogue of DISN products, services, and rates that will include full descriptions of service offerings, and performance and provisioning information associated with each. This will also involve an enhancement of the current web-based "rate book."

Table of Contents for Section 1

Paragraph:

1 - 5 General Information

CISA Rate Based

5.A DISN Switched Services
5.B DISN Switched Services - Special Features
5.C Hawaiian Information Transfer System (HITS)
5.D DISN Video Teleconferencing (VTC) Services - CONUS
5.E DISN Video Teleconferencing (VTC) Services - Europe
5.F DISN Video Teleconferencing (VTC) Services - Pacific
5.G DISN Transmission Services - CONUS
5.G (1) Less than 1.344 MBS Services
5.G (2) CONUS T-1/T-3 Transmission
5.H Caribbean Theater Transmission
5.I European Theater Transmission
5.J Pacific Theater Transmission
5.K Southwest Asia Theater Transmission
5.L DISN IP Router Services

Reimbursable Programs

5.M Defense Red Switch Network (DRSN)
5.N Joint Worldwide Intelligence Communication System (JWICS)
5.O Defense message System (DMS)
5.P Bosnia Contingency Services
5.Q Commercial Satellite Communications Initiative (CSCI)
5.R Tier-1 Allocation

Fee-for-Service Percentages and Surcharges

- 5.S FTS 2001 dedicated Access Line (DAL) Service Assessment
- 5.T Fee-for-Service and Special Fees
- 5.T (1) Fee-for-Service/Overhead Rate
- 5.T (2) Prior Year Universal Service Fund Allocation (USF)
- 5.T (3) Current Year USF Application Percentage

**DEFENSE WORKING CAPITAL FUND (DWCF)
COMMUNICATION INFORMATION SERVICES ACTIVITY (CISA)
BILLING RATES FOR FY 2001**

Section 1

1. Rates are published for FY 2001. For outyear estimates, use FY 2001 rates as the basis. **Customers are responsible for funding any workload increases in the outyears.**
2. **Fee-for-Service/Overhead Percentage:** In accordance with OUSD(C) guidance, a general and administrative (G&A) overhead factor of 2.0% has been included in the FY 2001 rates. All customers will be charged this same overhead factor.
3. **Areas of Service:** DWCF rates recover the costs of service between countries within or between theaters. For new service outside a theater, a customer will be required to pay for the cost of the access circuit to the closest node plus the theater rates for that node. The theaters are defined to include the following countries:
 - CONUS Theater.** Each of the contiguous 48 states of the continental United States.
 - European Theater.** Azores, Belgium, Bosnia (to include Kosovo and Macedonia), Germany, Iceland, Italy, Spain, Turkey, and the United Kingdom.
 - Caribbean Area.** Puerto Rico and U.S. locations in Cuba.
 - Pacific Theater.** Alaska, Australia, Guam, Diego Garcia, Hawaii, Japan/Okinawa, Korea, and the Pacific Ocean islands of Midway, Wake, Johnston and Kwajelein.
 - Southwest Asia (SWA) Theater.** Bahrain, Kuwait, Qatar, and Saudi Arabia.
4. Unless a POC is specified in other sections of this document, pricing for customer requirements, not specified within this rate letter, will be provided once the customer requirements have been submitted to the DISN Service Center (DSC).
5. A brief discussion of the FY 2001 rates for DWCF-CISA services contained in this catalogue of rates follows. Rates and charges are categorized into three sections, CISA Rate Based, Reimbursable, Fee-for-Service Percentages and Surcharges.

CISA Rate Based

A. DISN Switched Service - Voice: (Section 2)

(1) Usage billing is in effect for all theaters. The usage billing methodology charges for each completed call based on its length and originating/terminating locations. All rates (usage, precedence capability, and other special features) can be found in **Sections 2 and 3.**

**DEFENSE WORKING CAPITAL FUND (DWCF)
COMMUNICATION INFORMATION SERVICES ACTIVITY (CISA)
BILLING RATES FOR FY 2001**

Section 1

(2) The published rates are for calls placed during the local switch Business Day hours of 0700-1900. A 10% time of day discount is applicable to CONUS-to-OCONUS calls and for all OCONUS-originated calls.

(3) The published per minute rate for CONUS to CONUS is a flat rate irrespective of originating or terminating location. For OCONUS locations, there are no variations of per minute rates between countries, (e.g., the per minute rate from Stuttgart, GE to Aviano, IT is the same as from Ramstein, GE to Capodichino, IT). The same applies for calls originating in the OCONUS and terminating anywhere in CONUS, (e.g., the per minute rate from Stuttgart, GE to Ft. Belvoir, VA is the same as from Ramstein, GE to Scott AFB, IL). Intra-country rates are not dependent upon location, except for metro area calls. See paragraph B.2) below for further explanation of metro area rates.

(4) There is a new billing region in the Pacific Theater for FY 2001. This billing region is PO (Pacific Ocean). The PO region encompasses Johnston Island and Midway Island. These islands are not under the HITS rate structure. The addition of this new billing region is intended to alleviate the confusion of the previously published "Hawaii-to-Hawaii" rate. Kwajelein, Wake Island and Singapore are considered part of Hawaii for rates since the access lines from these areas to the DSN in Hawaii are customer funded. For switches located in the State of Hawaii, published rates will apply for all out of state calls. In-state calling would fall under the HITS rate structure. The DSN billing region BN (Bosnia) encompasses switches in Bosnia, Kosovo, Hungary, and Macedonia.

B. DISN Switched Service - Special Features Charges: (Section 3)

(1) **Precedence Capability.** A monthly recurring charge will apply for the capability to initiate precedence calls at Priority and above. Precedence capability is measured by the Precedence Access Threshold (PAT) levels at the voice switch in Alaska, the Pacific, CONUS, and the Caribbean. In Europe, precedence capability is measured by the 2-wire classmarks. The rates are theater specific and precedence level specific only. There is no distinction in rates for maximum calling area.

(2) **Metropolitan Calling Area (Metro).** Rates will apply to certain locations within Europe, the Pacific, and Alaska where there are two or more voice switches within a metropolitan area. OCONUS metro areas are determined by the commercial dialing structure, not by military communities of interest. The business day rate for calls within any metro area is \$0.0100 per minute. The non-business day discount also applies to metro area calls. A listing of the metro areas is contained in Section 3.

(3) **Exercise/Temporary Requirements.** Routine service requirements associated with exercises will be assessed the appropriate per minute charges. If additional leased access circuitry is required to the voice switch, the user will also be charged for the non-recurring charge (NRC) and monthly recurring charge (MRC). Priority and above precedence capability charges will be assessed per day (based on a standard 30 day month).

**DEFENSE WORKING CAPITAL FUND (DWCF)
COMMUNICATION INFORMATION SERVICES ACTIVITY (CISA)
BILLING RATES FOR FY 2001**

Section 1

(4) **Switched 56KB Service.** Two types of service will be offered. (a) digital service that supports VTC, bulk file transfer, Group IV fax (b) backup for other systems (e.g., NIPRNET) accessed through a 50X NPA. Rates for this service will be 2.0 times the applicable per minute rate for usage (both routine and precedence). The analog service that allows high speed modem traffic and improved Group III fax service is accessed through a 51X NPA. Rates for this service will be 1.5 times the applicable per minute rate.

(5) **Four Wire Access.** A monthly recurring charge will apply to these dedicated access lines in addition to the monthly recurring capability charge to initiate calls at Priority and above precedence. This service will also be assessed usage charges for the recorded minutes of use.

(6) **Conference Bridge Service.** A monthly recurring charge will apply to each conference bridge connected to the DISN. Each conference participant will also be assessed usage charges for their recorded minutes of use.

(7) **Reverse Charge Billing.** Reverse charge, or "800", type service is a DSN service offering. The per call rate is defined by the DSN originating and terminating region rates. DSN uses the 510 area code to denote this service. Contact the DSN Product Manager (DISA/D3122) at DSN (312) 653-8024 to establish this service.

C. Hawaiian Information Transfer System (HITS):

(1) Due to the complexity of the HITS rate structure, rates for individual services are no longer published in this Rate Letter. Rates for HITS Services are structured to follow the Contract Line Item Numbers (CLINs) that the customer will use to order electronically. Please contact the DISA-PAC HITS Program Manager at DSN 315-456-7700 for access to the full CLIN listing of HITS services and equipment.

(2) Monthly recurring charges will remain stable for the full fiscal year. Non-recurring charges may be adjusted during the fiscal year due to contract price adjustments, and these changes (if applicable) will be shown in the CLIN listing, along with the month during which they take effect. This adjustment process has been part of the contract since cut over and is not a new application of rates.

(3) Because of a significant decrease in the number of telephone lines (customer bundling phone lines behind PBX's), which have been used as the basis for collecting the investments costs associated with the HITS contract, FY01 HITS PBX trunk rates will be 2.5 times higher than the rates charged in FY00. This price change is necessary in order to execute the original investment goals of the program.

**DEFENSE WORKING CAPITAL FUND (DWCF)
COMMUNICATION INFORMATION SERVICES ACTIVITY (CISA)
BILLING RATES FOR FY 2001**

Section 1

D. DISN Video Teleconferencing (VTC) Services - CONUS: (Section 4)

(1) **Dial-Up Service (Equivalent to LBRV Service):** Many different transport vehicles can be utilized to access DISN VTC HUB Services, all of which will be charged to the user based on the pricing mechanism used by that transport provider; FTS Switched Services, DISN Switched Services and Commercial Switched Services will all be priced on a minute-of-use basis. Once customers arrive at the VTC HUB Facility, they will also be assessed on a minute-of-use basis, but this will be a reimbursement to DISN VTC Services. If the customers require a DISN access line from a non-voice switch, the customers will also be required to pay a flat rate charge per month for the access line to get to the DISN services. Rates applicable to this service are provided in **Section 4**.

(2) **Dedicated Facility Service in CONUS (Equivalent to Schedule D services):** The pricing for this service will consist of two components; access transmission from the customer facility to the closest VTC HUB, and a flat monthly charge for the use of the services at the VTC HUB. The pricing of the access transmission will be on the basis of mileage and therefore will vary per dedicated facility. The rates for this component (Transmission - CONUS T-1) are provided in **Section 7, Part 4**.

Use of the services at the VTC HUB will be priced per **Section 4**. Rates have been adjusted to provide global services. The actual price is dependent on the facility bandwidth and the number of shared facilities behind the access transmission.

E. DISN Video Teleconferencing (VTC) Services - Europe: (Section 5)

Pricing for the DISN Europe HUB is based on prorating the costs of the network to the known VTF's. A proportionate share of the costs will be assessed monthly to the customers identified by USEUCOM. A "minute of use" rate charge will be assessed to other users of the DISN VTC HUB.

F. DISN Video Teleconferencing (VTC) Services - Pacific: (Section 6)

DISA will provide DVS-G services to Pacific Theater customers, dedicated and dial-up, under a collective service agreement to cover the cost of the existing DVS-G Pearl Harbor Hub infrastructure for a flat MRC. The MRC funds unlimited usage for all customers covered under the umbrella. If the existing infrastructure is upgraded in response to Pacific customer requirements, under the collective service agreement the increase in costs to provide DVS-G services will require re-negotiation of the flat MRC. No out-of-hours charges for conferences conducted 0001 Monday to 2400 Friday, EST. If a customer directs a remote hub to be manned, they will be responsible for out-of-hours charges.

**DEFENSE WORKING CAPITAL FUND (DWCF)
COMMUNICATION INFORMATION SERVICES ACTIVITY (CISA)
BILLING RATES FOR FY 2001**

Section 1

G. DISN Transmission Services - CONUS: (Section 7)

(1) **Less than 1.344 MBS Service:** CONUS transmission rates for less than 1.344 MBS services are comprised of a monthly connection charge plus a monthly mileage charge. The mileage charge is based upon the circuit mileage and declining block charges. Declining block charges breaks the circuit into discrete mileage segments for the computation of charges, with each successive segment incurring a lower mileage charge. The declining block charge bands are 1-50 miles, 51-100 miles, 101-500 miles, and greater than 500 miles. A non-recurring charge is applied to defray the cost of circuit installation and activation for new circuits, and circuits which increase in bandwidth. Rates are contained in **Section 7, Part 1.**

(2) **CONUS T-1/T-3's:**

(a) Pricing for T-1 and T-3 transmission services will consist of three components; access transmission from the originating service delivery point (SDP) to the closest available bandwidth manager (BWM), access transmission from the terminating SDP to the closest available BWM and the backbone transmission from the originating BWM to the terminating BWM. Prices for T-1 and T-3 access components are provided in **Section 7, Part 4a & 4d** and the prices for the backbone components are provided in **Section 7, Part 4b & 4e.** Prices for other than published SDP's will be calculated once the customer requirements have been provided to the DISN Service Center (DSC).

(b) Prices for special features (CSU's equipment and service relocation, equipment maintenance, etc.) associated with T-1 and T-3 transmission services are provided in **Section 7, Part 4c.**

H. Caribbean Transmission:

(1) Inter-Caribbean Transmission billing rates are provided in **Section 7, Part 2.** These rates are independent of distance between originating and terminating locations within each country but are bandwidth sensitive.

(2) Intra-Caribbean Transmission billing rates are provided in **Section 7, Part 3.**

I. European Theater Transmission: (Section 8)

(1) Billing rates are contained in **Section 8.** Intra-Country rates are based upon a fixed monthly recurring charge and a per kilometer distance charge. These charges are bandwidth sensitive and country specific. There is also Metro Area rates for circuits that are less than 10 kilometers in length. The Metro Area rates are also country specific.

**DEFENSE WORKING CAPITAL FUND (DWCF)
COMMUNICATION INFORMATION SERVICES ACTIVITY (CISA)
BILLING RATES FOR FY 2001**

Section 1

(2) International rates are independent of distance between originating and terminating locations within each country, (e.g., a 64KB circuit from Stuttgart, GE to Aviano, IT is the same price as a 64KB circuit from Ramstein, GE to Naples, IT). Rates are bandwidth sensitive.

(3) DISA offers network management service for a customer owned, customer supported IDNX. There is a basic monthly charge for this service that is determined by the number of shelves in the IDNX. **The FY 2001 monthly charge per shelf is \$661.00.**

(4) Some circuits (example, DSCS) are routed temporarily through a DISA IDNX, although they do not exit onto a leased path. When this occurs, the circuit occupies a port on the IDNX, thus incurring some maintenance and network management charge. **The FY 2001 monthly charge for these circuits is \$23.00.**

J. Pacific Theater Transmission: (Section 9)

(1) Billing rates are provided in **Section 9**. Intra-Country rates are based upon a fixed monthly recurring charge and a per kilometer distance charge. These charges are bandwidth sensitive and country specific.

(2) International rates are independent of distance between originating and terminating locations within each country, (e.g., a 64KB circuit from Hickam AFB, HI to Misawa AB, JA is the same price as a 64KB circuit from Schofield, HI to Camp Zama, JA). Rates are bandwidth sensitive.

(3) DISA offers network management service for a customer owned, customer supported IDNX. There is a basic monthly charge for this service that is determined by the number of shelves in the IDNX. **The FY 2001 monthly charge per shelf is \$661.00.**

(4) Some DSCS circuits are routed temporarily through a DISA IDNX, although they do not exit the DSCS onto a leased path. When this occurs, the circuit occupies a port on the IDNX, thus incurring some maintenance and network management charges. **The FY 2001 monthly charge for these circuits is \$23.00.**

K. Southwest Asia (SWA) Theater Transmission: (Section 10)

(1) DISN Transmission-SWA is a new DISA DWCF Transmission Program. Billing rates are contained in **Section 10**. In FY2000, DISA accepted this network of IDNX/Promina Multiplexers from CENTCOM and the MILDEP components. Bandwidth is provided between the nodes by CSCI and DSCS satellite services. Two contractors at RNOSC-Bahrain provide 16x7 network operations support; support outside these hours is provided by RNOSC-Europe.

(2) International rates are independent of distance between originating and terminating locations within each country, but are bandwidth sensitive.

(3) Intra-Country rates are based upon a fixed monthly recurring charge and are bandwidth sensitive, but not country specific.

**DEFENSE WORKING CAPITAL FUND (DWCF)
COMMUNICATION INFORMATION SERVICES ACTIVITY (CISA)
BILLING RATES FOR FY 2001**

Section 1

(4) DISA offers network management service for a customer owned and customer supported IDNX. There is a basic monthly charge for this service that is determined by the number of shelves in the IDNX. **The FY2001 monthly charge per shelf is \$900.**

(4) Some circuits, such as DSCS, do not use any leased paths but are on nodes managed by DISA DWCF funded contractors. When this occurs, the circuit occupies a port on the IDNX, thus incurring some maintenance and network management charges. **The FY 2001 monthly charge for these circuits is contained in Section 10.**

L. DISN IP Router (NIPRNET & SIPRNET) Service: (Section 11)

(1) The DISN Router rate structure has been adjusted to be more consistent with commercial practices. Low speed rates are higher per kilobit to reflect the burden upon the system caused by the inefficient use of valuable router resources. Since dial-up rates for router service are significantly lower than low speed data rates, dial-up service should serve as a more cost-effective choice for service.

(2) Cost recovery for the DISN router layer will be by bandwidth port charges by theater (e.g., \$405/month for a 64 KBS port in CONUS). The router charges will cover the costs of providing service from the last terminal router delivering the service to the network to the first terminal router receiving the traffic from the network. Dial-up terminal router service cost will be recovered through monthly subscriber charges. A non-recurring charge is applied to defray circuit installation and activation costs for new circuits or changes to bandwidth. Rates are provided in **Section 11.**

(3) Future DISN IP Router rates will be refined to better reflect commercial pricing as well as to introduce charges designed to control inefficient use of the networks. Charges will be introduced to recover costs resulting from inefficient use of the networks. It is envisioned that separate charges will apply for such services, as trouble shooting assistance when the trouble is traced to a network behind the customer router, use of non-approved configuration or equipment, untrained personnel, etc. Charges may apply when customers use dial-up service for other than infrequent requirements as the service is intended, or when passwords are given to multiple users. Usage charges for dial-up service is currently under review.

(4) The introduction of Internet Access and Usage Charges have been postponed so that DISA can analyze the consequences of introduction of Internet Access Charges upon customer incentives to implement the DOD Internet disconnect policy.

**DEFENSE WORKING CAPITAL FUND (DWCF)
COMMUNICATION INFORMATION SERVICES ACTIVITY (CISA)
BILLING RATES FOR FY 2001**

Section 1

REIMBURSIBLE PROGRAMS

M. Defense Red Switch Network (DRSN): Annual billing rates for FY 2001 are provided in **Section 12**. Rates are based on the user port allocation methodology.

N. Joint Worldwide Intelligence Communication System (JWICS): Billing rates for FY 2001 are provided in **Section 13**.

O. Defense Message System (DMS): (Section 14)

(1) DMS (LCM) costs, provided in **Section 14, Part 1**, are allocated to customers by the Resource Management Committee (RMC) approved allocation percentages, which were based upon customer FY 1995 AUTODIN usage. As DMS is deployed and becomes fully operational, a more equitable cost recovery methodology based upon customer usage or other attributes will be developed.

(2) DMS Transition Services: Customers, other than Army, Navy, Air Force, and DISA who are covered by the Program Budget Decision (PBD), will be billed using a structure similar to the old AUTODIN rate structure. Billing rates for FY 2001 are provided in **Section 14, Part 2**.

(3) DMS Transition Hub (DTH): The allocations for the Pirmasens, Ft Detrick and Honolulu DTH's are provided in **Section 14, Part 3**. For the costs associated with the Hancock DTH, DISA was directed by OSD(C) to incur a \$4.2M loss in FY00 and a \$1.1M loss in FY01.

P. Bosnia Contingency Services: DISA provides transmission services to Bosnia contingency forces at a number of fixed sites per requirements specified by EUCOM and the MILDEP's. The costs associated with these requirements are managed and paid for by DISA's DWCF, but per previous agreements, the MILDEP's fully reimburse DISA for the costs since they are not part of DISA's DWCF Rate Based Communications Programs.

DISA/D5 sets MRC cost allocation rates based on required bandwidth and by countries served. Since this is a cost reimbursable program, MRC's can change during the execution year when there are changes in costs and/or EUCOM/MILDEP requirements. Decreases in MILDEP circuit requirements most likely will not result in decreases in cost allocation rates. Because of termination liabilities and fixed costs associated with satellite communications, circuit disconnects will most likely increase the MRC cost allocation rate to the remaining customers. MRC's can also be impacted by the final results of the execution year, even though a zero profit/(loss) scenario is planned. Since this is a reimbursable program, profit/(loss) from prior execution years could change the MRC for the current execution year.

**DEFENSE WORKING CAPITAL FUND (DWCF)
COMMUNICATION INFORMATION SERVICES ACTIVITY (CISA)
BILLING RATES FOR FY 2001**

Section 1

After the 2nd quarter of the fiscal year and again after the 3rd quarter, costs and cost allocation rate projections will be reviewed and the rates increased or decreased to fully recover costs during the fiscal year. Circuits discontinued on or after 1-August will receive a cost allocation charge through the end of the fiscal year.

Based on anticipated FY2001 costs and EUCOM/MILDEP requirements, the FY2000 MRC's will continue to be charged in FY2001.

Q. Commercial Satellite Communications Initiative (CSCI): Under the provisions of CJCSI 6250.01, DISA has been appointed by USCINCSpace, the Satellite Communications Operations Manager (SOM), to be the SATCOM System Expert (SSE) for commercial satellite communications. Under this appointment, DISA has the responsibility to help DoD customers, with validated and funded requirements, acquire commercial satellite communications capabilities. DISA also serves as an advocate for the use of commercial satcom in order to increase the availability and flexibility of military communications.

DISA exercises this responsibility through the Commercial SATCOM Services Office, which works closely with the customer to ensure their requirements are met in a cost-effective and affordable manner. One of the principle tools used by the CSSO is DISA's Managed Transponder Contract (MTC). The MTC offers customers the opportunity to lease whole commercial transponders in the C and Ku bands and also provides active management of the leased transponders. Active management provides for more efficient use of transponder resources (power and bandwidth) and real-time troubleshooting of problems to minimize disruptions of service. The MTC is operated on a cost reimbursable basis. Each transponder lease must be supported by a business case that examines the requirements, financial terms, and the risks associated with the proposed service. Each leased transponder must be fully funded by a customer or group of customers. The CSSO is pursuing alternatives that would permit greater flexibility in meeting customer requirements; from the lease of partial transponders to shorter-duration leases (hours to several months). The CSSO is also interested in providing "end-to-end, turn-key" services to prospective customers.

In order to receive assistance in obtaining commercial satcom services, potential customers should contact the Commercial SATCOM Services Operations Officer (COO) directly or via the appropriate DISA field activity or Regional SATCOM Support Center (RSSC). In order to activate service, a prospective customer must be able to fully fund the requested services for the initial lease year.

R. Tier 1 Allocations: The Deputy Secretary of Defense directed that a two-tier pricing system be implemented for telecommunications services beginning in FY00. This rate structure is needed to encourage the use of joint telecommunications systems while promoting security, interoperability, and efficient practices across the Department. Tier-one covers costs to

**DEFENSE WORKING CAPITAL FUND (DWCF)
COMMUNICATION INFORMATION SERVICES ACTIVITY (CISA)
BILLING RATES FOR FY 2001**

Section 1

provide the military readiness attributes not available in commercial systems.

PBD 417 dated 11/99, based the Tier-one allocation for FY01 and subsequent years on customer TOA. The allocated amounts for FY01 are provided in **Section 15**.

FEE-FOR-SERVICE PERCENTAGES

S. FTS 2001 Dedicated Access Line (DAL) Service Assessment: During the transition from FTS2000 services to FTS2001, customers noticed that requested dedicated access lines used to deliver toll-free services to the base switch were being charged to the Host Activity and not to the on-base customers behind the switch. Since the FTS2001 vendors indicated they would be unable to administer the proper charges back to the applicable on-base customer, DITCO developed an alternative billing strategy.

This new strategy will also require DITCO to establish an additional percentage to recoup the costs of the DAL features and state surcharges. The FY2001 percentage will be 10% and will be applied to the DAL MRC and the 800 Inbound Toll Free Usage Charges.

T. Fee-for-Service Percentages and Special Fees:

(1) **Fee-for-Service/Overhead Rate:** General and administrative costs incurred to provide value-added-services to the overall DWCF-CISA customer base are recovered per the application of a surcharge/percentage on the basis of programmatic revenues. The FY2001 percentage will be 2%. This percentage is applied to the revenues that result from the rates within this rate letter and revenues generated from "contract pass-through" billing.

(2) **Prior Year Universal Service Fund (USF):** Per the implementation of the Universal Service Fund (USF), the DWCF-CISA incurred costs in FY99 as a result of USF payments to vendors. PBD 417 provided the Services with the funds to payback these costs. The funds for the FY99 USF costs will be collected in FY2001. The directed allocations are provided in **Section 16**.

(3) **Current Year USF Application Percentage:** In order to collect for the USF payments to vendors in FY01, a percentage of 7.91% will be applied to DISN Service Revenues. The percentage will not be applied to Red Switch, DMS, JWICS, CSCI and Tier 1 revenues. Funds for this assessment have been provided to the customer accounts per Program Decision Memorandum (PDM)(U) dated August 1998

(4) Special fees for use of DITCO resources for customer specific projects will be published as a future addendum to the rate letter.

**DEFENSE WORKING CAPITAL FUND (DWCF)
COMMUNICATION INFORMATION SERVICES ACTIVITY (CISA)
BILLING RATES FOR FY 2001**

Section 1

5. Point of contact for the DWCF-CISA service rates is Mr. F. Michael Ponti,
Chief, DISN Business Office at DSN 327-6543, Fax DSN 327-4158, or E-mail
pontif@disa.ncr.mil.

Section 4
DISN VTC Services - CONUS

Pricing for DIAL-UP Services

Usage of HUB Services

- \$.90 per minute per port

Usage of CONUS-OCONUS HUB Services

- \$.90 per minute per port
- \$.60 per minute per each 64 Kbps of service requested between theater HUBS. (Example: VTC services requested at 128 Kbps between theaters would be \$1.20 per minute).

Transport: User pays for transport to VTC HUB.

- FTS Switched Service: Per Minute
- DISN Switched Services: Per Minute
- Commercial Switched Services: Per Minute

Note: If the customer requires a DISN access line from either a non-voice switch or a voice switch to support dial up video only, the customer will be required to pay a flat rate charge of \$1,200 per month for the access line in addition to per minute charge for using the access line.

Pricing for Dedicated Facilities

Access Transmission: (Access from facility to closest VTC HUB)

- Access prices for transmission will vary per mileage. Prices are available in the DISN Transmission Service Section.
- Calculated price will be charged each month.
- No additional charge for shared facilities.

Usage of HUB Services:

- Monthly flat rate charge per facility bandwidth requested.
- Additional flat rate charge for shared facilities.
- Rates provide CONUS and OCONUS conferencing capabilities.

Fixed Price per Month

	1 VTC	2 VTC	3 VTC	4 VTC
384 Kbps	\$4,635			
768 Kbps	\$5,170	\$5,840		
T-1 Mbps	\$5,645	\$6,515	\$7,385	\$8,255

Note: Pricing for Dial-Up Services and Dedicated Facilities are based on VTC usage during normal working hours, an additional charge will be assessed for out-of-hours usage. Further information on out-of-hours costs can be found on the VTC web page (disavtc.spawar.navy.mil).

**DEFENSE WORKING CAPITAL FUND (DWCF)
COMMUNICATION INFORMATION SERVICES ACTIVITY (CISA)
BILLING RATES FOR FY 2001**

Section 5
DISN VTC Services - Europe Theater
(\$)

Pricing for Use of European HUB Services:

	ANNUAL	MONTHLY
USAREUR	315,000	26,250
USAFE	315,000	26,250
NAVEUR	315,000	26,250
HQ USEUCOM	88,000	7,333
DISA-EUR	25,000	2,083
MTMC	25,000	2,083
MARFOREUR	2,000	167

Subscription Rate is for Flat-Rate Services provided at the VTC HUB, for all registered users within the identified organization. VTC rates in the Europe theater are based on an allocation coordinated by the EUCOM J-6.

Any additional video conferencing customers not covered in the above table must contract DISA for service. These customers will be charged an agreed upon amount during the TSR/TSO validation process.

Transport to the Europe VTC HUB is the financial responsibility of the user.

Section 11
IP Router (NIPRNET & SIPRNET) Service
(\$ per Month)

ADDITIONAL CHARGES:

NRC for installation: \$2,500 for <512KBPS and \$5,000 for \geq 512KBPS.

Dial-up service: \$50 initiation fee plus \$27.00 monthly service fee.

The management of customer premise routers (CISCO OR WELLFLEET) have a flat fee of \$50.00 per month. All other router management (not CISCO OR WELLFLEET) will require a specific cost estimate to determine a fee.
